

CODY™ CUSHION

Patent Pending

Smooth your ride with a Cody Cushion

The unique **Cody Cushion** allows you to enjoy the ride qualities of an expensive air ride system like the big rigs. Increasing driver comfort by ironing out road seams and bumps isn't the only advantage of the **Cody Cushion**. By smoothing the hammering action between the trailer and hitch, the air cushion ride saves wear and tear on your tow vehicle, trailer, load, and the hitch itself.

Because the **Cody Cushion** mounts to your truck hitch, not a trailer, it works with every gooseneck trailer you hook up to, not just one.

- *Adjustable air spring for load specific cushioning*
- *Designed to fit the CODY HITCH and can be special ordered to fit other common hitches*
- *Rated for up to 6000 lbs vertical tongue weight*
- *Optional self leveling kit*

Cody Hitch

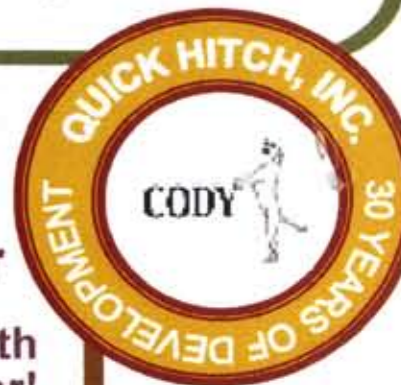

Easy Flip Ball . Heavy Duty . Universal

Cody Coupler

Tow your 5th wheel trailer!

Cody Cushion

Smooth your ride!

CODY™ HITCH

Patent 6099015

The most versatile and convenient Gooseneck Trailer Hitch Available!

Affordable

The very affordable suggested retail price makes it easy to own this first class, heavy duty, easy to use, gooseneck hitch.

Safety Chain Hooks

Most Cody Hitches are now being shipped with the unique Cody Safety Chain System. Two hardened steel hooks secure with a quick twist. This system does not require drilling or installation. Traditional U-Bolt safety chain devices are available if desired.

No Drill Kits

The AO50 Cody Universal Gooseneck Hitch is currently being installed on most full sized pickups, however, optional No Drill Installation Kits are available to make installation even easier. We have installation solutions for the late model tubular frame trucks, even an easy bolt on for the new Tundra. Your Cody Hitch dealer/installer can give you a clean, secure installation in virtually any full sized pickup truck. Your Cody Hitch dealer or PullWithCody.com can give you complete info on installation kits.

Reversible Ball

The patented reversible ball can be flipped over in seconds, not minutes, by simply lifting, turning, and triggering the latch mechanism from inside the bed.

No linkage or pins below the bed in the dirt!
No reaching under the truck in snow and mud!

The "straight thru" design allows dirt and water to pass through, reducing freeze-up problems.

Universal Cody Hitch AO50 with safety chain hooks.

CLEAR BED DESIGN

Ball up Ball down

Heavy Duty

Rugged construction - made from high quality steel. A 35,000 lb GVW and 7,500 lb gross tongue weight rating is achieved with a heavy DUAL BOXED beam center section formed from 1/4" steel plate.

Universal

The Cody Hitch can be adjusted to accommodate virtually any truck from new to 30 years old.

CODY™ COUPLER

Self latching 5th Wheel to Gooseneck Converter

Patent 6416073

The Cody Coupler adapts a 5th wheel trailer to be towed by a vehicle equipped with a gooseneck hitch!

The Cody Coupler is easy to install without any cutting, drilling or welding on your trailer. Attachment to the kingpin is done with two horse-shoe clamps and set screws. All pivot action is on the gooseneck ball.

Using this self-latching coupler makes trailer hookup quick and easy to any truck equipped with a gooseneck hitch.

Rated at 24,000 lbs GVW (Total Truck and Trailer).
